

Oh-so Portable Grills

Waking up to the smell of bacon and eggs cooking and coffee brewing is truly one of life's simple pleasures. Now imagine that wonderful experience accompanied by a sunrise over a majestic outdoor setting.

Built to withstand the African Bush by being rugged, lightweight and very portable, the CADAC 2-Cook Supreme is a two-burner gas cook top. Whether it's heating up a pot of chili at a tail-gate party or cooking breakfast at a campsite, this stove is a simple and efficient solution to outdoor cooking; breakfast, lunch or dinner, all day long. Open the lid, push the starter button and the two stainless steel burners light instantly. Each burner has its own nickel chrome plated pot stand and individual controls that allow them to be operated independently.

No more pouring the gas, assembling parts or pumping up the tank. The CADAC 2-Cook Supreme comes with ribbed and flat griddle plates that can be put in place over one burner allowing the ability to boil a kettle on one side while grilling on the other.

For stability, the stove has non-slip rubber feet for use on a tabletop and screw on legs for free standing use. Gas is provided from a refillable cylinder via the included hose and regulator. When it's time to go home, just close the lid and slip the stove back in its carry bag.
